## Geotechnical engineering firm opens in Edmond

Red Rock Consulting LLC, a geotechnical engineering firm, recently opened in Edmond.

A woman-owned small business specializing in geotechnical engineering in Oklahoma and north Texas, the firm's project experience includes ODOT,

**Bumpas**

USACE, FAA, transportation, university, medical, municipal, commercial, airport and residential. Red

**Rock**

Consulting is the only geotechnical engineering firm certified as a Disadvantaged Business Enterprise by the Oklahoma Department of Transportation.

Red Rock Consulting President and Project Engineer Kristi K. Bumpas is the only LEED accredited geotechnical engineer in the state of Oklahoma. The company incorporates LEED and sustainable principles into each report.

The company offers experience in soils testing and evaluation, pavement testing and evaluation and project management.

Bumpas' experience includes managing the geotechnical aspects of portions of many large-scale projects such as the \$600 million I-40 Crosstown Relocation in Oklahoma City, the \$70 million Interdisciplinary Science Research Building at Oklahoma State University and the \$23 million Oklahoma City Zoo Asia Exhibit.
